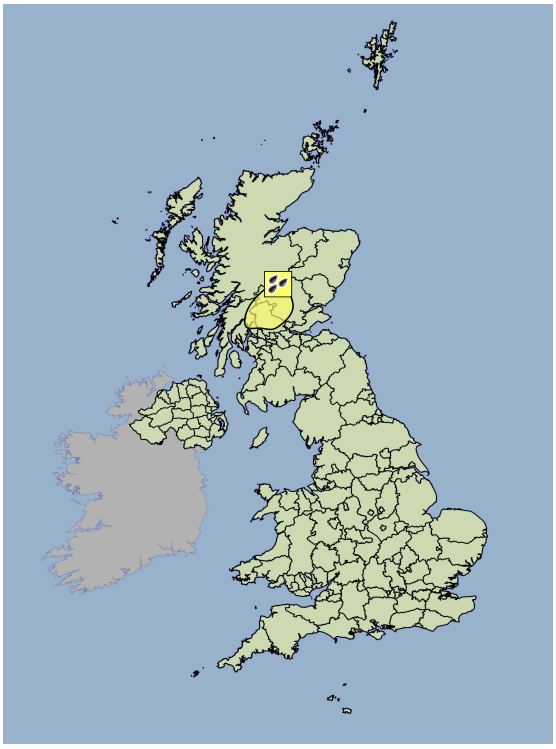
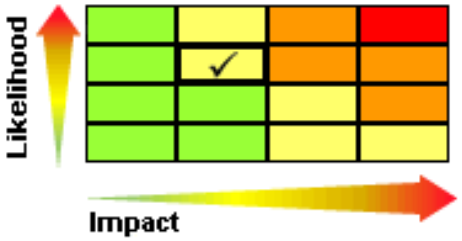
National Severe Weather Warning Service





Chief Forecasters Assessment
Accumulations of 15 to 30 mm are likely, with perhaps over 40 mm over some higher ground. Given recent heavy rain, and a possible contribution from mountain snow-melt, some minor flooding is possible.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **08:00 on Wed, 17th Apr 2013** until **23:59 on Wed, 17th Apr 2013**

Rain will become persistent and occasionally heavy during Wednesday morning and for a time into the afternoon, before turning more showery later in the day.

The public should be aware that localised flooding may occur on already saturated ground.
